## Safely reduce nitrate levels in your water.

Nitrate is one of the most common groundwater contaminants in rural areas, originating primarily from fertilisers and septic systems. Nitrate is particularly harmful to babies & infants less than 3-6 months, causing affected blood to carry less oxygen than it should. There are also studies linking nitrate in drinking water with cancer, where nitrate levels are at or above 100-200 mg/l. Protect you and your family with the right water filtration solution.

### BUNDLE DEAL

SAVE 10% WHEN YOU PURCHASE A NTR40-E3 WITH A WH2-55 SYSTEM

#### NTR40-E3

The Puretec NTR Series takes the worry out of your water by reducing the nitrate levels to safe levels for human consumption. It utilises nitrate-selective ion-exchange resin to purify the water & automatically regenerates the resin with salt in the backwash process, providing exceptionally long resin life and minimal maintenance experience.

#### WH2-55

The Puretec WH2-55 is designed for mains water supplies reducing chlorine, taste & odour, chemicals and sediment in your water, giving good general purpose filtration. This system protects and prolongs the life of appliances throughout your home and features long-life filter cartridges. It operates on low pressure which is important when multiple taps are used simultaneously throughout the day.

### FREE CARTRIDGE

RECEIVE A **FREE IL146Q REMINERALISER CARTRIDGE** WITH A R0270 PURCHASE.

#### R0270

When only the purest water will do, conveniently on tap. The latest in Reverse Osmosis, a filtration process for high purity water. The ultra-fine membrane operates by rejecting impurities and flushing them out to drain. This system effectively eliminates 98% of all dissolved impurities, heavy metals, salts, viruses, bacteria, cysts, fluoride, nitrate, chlorine, taste, odour, and chemicals.

#### IL146Q

Adds calcium carbonate to the water, improving the taste & lifts the pH level to neutral.
